

Hard Dodger on SHANGRI LA

Hard Dodger on SHANGRI LA - Michael Homsany, Kendra Pinsker

Design goals were for the dodger to have a removable top, be dry and comfy, strong enough to take a large wave, hold the solar panels, collect water and for the lines to flow into the lines of the DE. Time will tell on the strength, it is dry and comfy, and collects water well. The lines are in the eye of the beholder, but it looks ok to me (I can see it finished).

Footprint outlined on deck

Laying out footer

Footer glued on deck

Laying up sides (construction braces removed later)

Roof lip rabbeted to beams

Sides with corner beams & fixed roof beam

Cutting in roof beams

Aft view of clamped roof
